

Aquaskim

- Thanks to a two-piece telescopic tube it is infinitely height adjustable
- A float automatically handles water level differences, the height can be easily adjusted without tools. Even adapting to shallow water levels is possible
- A smaller tube diameter ensures less air content and thus prevents the surface skimmer from floating
- Just 10kg ballast material in the skimmer's base will ensure absolutely stable set-up

CODE	OPS350
DESCRIPTION	Aquaskim 40
HEIGHT ADJUSTABILITY 1	550—830mm
HEIGHT ADJUSTABILITY 2	300—550mm
TUBE DIAMETER	80mm
FILTER BASKET VOLUME	1.4L
PUMP CAPACITY	4000-16000l/hr
OUTLET CONNECTION	1½"

Pondovac 3

- PONDOVAC 3 enables continuous, powerful vacuum removal of dirt and sludge from the pond. Two same-size cylinders are filled and emptied in alternating cycles.
- Transport castors ensure that the device can be easily moved
- Accessories include: String algae nozzle, floor nozzle, suction tube extension, folding transport handle, debris collection bag for the water return
- It is also ideally suited for wet vacuum implementation in the household
