

Colliquip Bio

Zeolite has a porous structure that can accommodate a wide variety of molecules such as Sodium; Calcium; Magnesium; Potassium; Phosphates and others. Zeolite is widely used as a water filter medium because it can be used to absorb ammonia and other nitrogenous compounds which are harmful to plants and fish. Used in combination with a fine silica sand, it gives excellent mechanical Filtration & Bio-filtration.

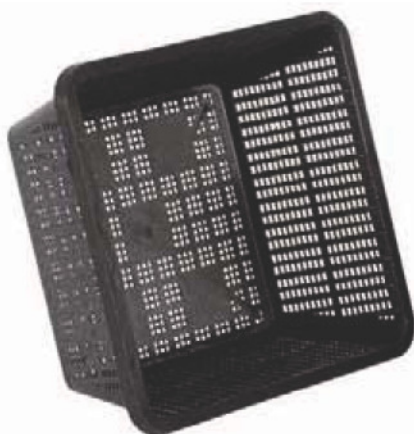

BMZ— Zeolite—50kg

CODE	DESCRIPTION	3 BAGS		MAX POND CAPACITY	
		SILICA	ZEOLITE
