

### Rain curtain

**Create a Unique Feature**

Each "RAIN CURTAIN MODULE" consists of 100's of tiny nozzles in 5 overlapping rows. This creates fine streams of water which break up into drops, and gives the unique impression of a rain shower.

- Light it up with our range of submersible LED strip lights which are flexible and come in Red; White; Blue & Colour changing
- The density of the rain makes a great visual impact in a narrow space
- The RAIN CURTAIN also has a fantastic cooling effect
- Gives the impression of real heavy rain great for shows

- The rain curtain can be made up into lengths of up to 5m. The curtain must be multiples of 100mm
- The low pressure required to operate the curtain makes it economical to run
- The density of the curtain makes it ideal for rear projection or laser shows
- A great attraction to fall into a swimming pool
- Makes a soothing rain sound when falling into water.
