

Water Trio

CODE	OWT
DESCRIPTION (LxBxH)	Water Trio
DIMENSIONS	430x300x240mm
JET DIAMETER	4.5mm
MAX JET HEIGHT	1.4m
MINIMUM LEVEL	130mm
MAXIMUM LEVEL	230mm

- Unique dynamic water effects with 3 illuminated nozzles.
- High quality LED technology as brilliant white luminous LED rings
- Different permanently set programs can be selected via remote control

Included in the programs:

- Variation of fountain height, speed & intensity of the LED illuminated rings
- Safe, energy-efficient 12V technology
- Robust floor plate protects against damage

Included in the set:

Water effect, external control unit, cable, transformer & remote control

Ideal implementation possibility:

Flexible implementation - e.g. on the terrace or in a bed of gravel combined with a water reservoir.

Water Jet Lightning

CODE	OWJL
DESCRIPTION	Water Jet Lightning
DIMENSIONS (LxBxH)	150x115x200mm
JET DIAMETER	8mm
MAX JET DISTANCE	1.8m
MAX JET HEIGHT	0.9m

Magical water/light effects cast their spell and they do it twice. Water Jet Lightning is delivered as a 2-unit set that can be quickly installed thanks to "Plug'n'Spray". Integrated LED technology illuminates the laminar water jet. The permanently set programs that vary in jet length and colour can be selected via remote control. Water Jet Lightning in the 2-unit set, including pump permanently set programs can be selected via remote control.

Included in the programs:

Light colour and jet distance variations, LED technology with changing colour and fixed RGB light, Safe energy-efficient 12V technology, High quality design with stainless steel applications, Unique "Plug'n'Spray" concept for fast installation.

Included in the set:

Energy-efficient pump, control unit & transformer, 6m cable & remote control

Implementation in the water and out of the water, e.g. from the bank into the water or in a bed of gravel.
